RATIONALE
Personal financial planning (PFP) is becoming increasingly important, both to individuals and to professionals, in their offering of services to the public. Governments have made it very clear that the public sector will support retirees and the unemployed to a ‘safety-net’ standard only. In addition, people increasingly will be asked to oversee their superannuation savings. Individuals will have more comfortable lives if they plan and manage their finances skilfully.

SYNOPSIS
In this course students will be exposed to the economic environment in which financial planning takes place. Financial markets and products are introduced and the legal framework in which planners operate is examined. As an introductory course to financial planning education, the financial planning process is analysed as are ethical issues and codes of practice for planners.
