REQUISITES
Pre-requisite: Students must be enrolled in one of the following Programs: GCNP or GDON or GDMH or MANP or MHEA or MMID or MMPO or MNUR or MNRS or MNRH or PCNP or PDON or PDMH or PDEV or SING or CRPG

RATIONALE
Professional nurses and midwives need to engage in continuous reflection on developments within their own practice and to be continually exploring theoretical explanations of its basis. They must be able to contribute to national and international efforts to understand the nature of their field and to work toward changing health care services for the better.

SYNOPSIS
This course will prepare the student to contribute to the development of nursing knowledge through a study of personal clinical practice and relevant theory. First the student will examine their own clinical practice and come to a deeper understanding of their own informed theories of practice through observation and critical reflection. Then the student will critically evaluate nursing theory and meta theory. Finally, the student will look for evidence of a nursing or midwifery theory consistent with their own practice. This will involve enhancing skills in reflection, analysis, synthesis and critique. The philosophical stance of the course derives from critical social theory and as such is concerned with improving practice through emancipatory processes.

OBJECTIVES
On successful completion of this course students will be able to:
• develop advanced skills in reflection, analysis, argument and criticism;
• develop advanced skills in key concepts, assumptions and individual patterns in record and reflect upon critical incidents in their own area of practice;
• identify their own practice;
• critically analyse the value of theory in developing nursing and midwifery knowledge;
• analyse future trends of philosophical inquiry in nursing and midwifery practice.
