RATIONALE

This Masters level course is designed to facilitate synthesis of knowledge from previous studies as the basis for addressing the learning needs of the student, through a learning contract based on the identified area of professional interest for the student.

SYNOPSIS

This course is based on a negotiated learning contract between students and course leader. The learning contract requires that students draw on their previous learning to identify their current learning needs. The students, in consultation with the course leader, will then agree upon learning objectives, learning processes and methods of evaluation.

OBJECTIVES

On successful completion of this course students will be able to:

1. develop a learning contract which identifies own learning objectives, resources, learning processes and method/s of evaluation; and
2. achieve a level of knowledge and skills as negotiated in the learning contract.
