Examiner: Tony Machin
Moderator: Yong Goh

REQUISITES
Pre-requisite: PSY2100

RATIONALE
The discipline of psychology is based on a solid foundation of scientific research. Researchers use a variety of conceptual, logical and mathematical tools to reduce uncertainty in the state of psychological knowledge. This course introduces more advanced research methodologies and mathematical tools.

SYNOPSIS
This course builds upon the basic methods and tools of psychological research, extending the range and complexity of questions which can be addressed. A wide diversity of research designs are introduced including non-reactive techniques, complex experimental and quasi-experimental designs and single-subject designs as ways of answering specific questions and dealing with potential confounds. The statistical and analytic tools associated with these more advanced techniques are also explored including factorial analysis of variance, and analytic comparisons.

OBJECTIVES
On successful completion of this course students will be able to:

1. describe different research designs, identify when it is appropriate to use them, and discuss their limitations;
2. describe different statistical techniques, identify when it is appropriate to use them, and discuss their limitations;
3. evaluate the appropriateness of the research design and statistical analysis used in selected examples in published research;
4. write a properly formatted results section of the type found in Psychology journals that correctly interprets and explains both descriptive and inferential tests;
5. identify the ethical guidelines researchers must follow and describe how researchers apply ethical decision making to resolve complex ethical issues.

**TEXT and MATERIALS required to be PURCHASED or ACCESSED:**

ALL textbooks and materials are available for purchase from USQ BOOKSHOP (unless otherwise stated). Orders may be placed via secure internet, free fax 1800642453, phone 07 46312742 (within Australia), or mail. Overseas students should fax +61 7 46311743, or phone +61 7 46312742. For costs, further details, and internet ordering, use the 'Textbook Search' facility at http://bookshop.usq.edu.au click 'Semester', then enter your 'Course Code' (no spaces).

(Macintosh or Windows)

**REFERENCE MATERIALS:**

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

NOTES:
1. Examination dates will be available during the Semester. Please refer to the examination timetable when published.

IMPORTANT ASSESSMENT INFORMATION

1. Attendance requirements:
   It is the student's responsibility to participate actively in all course activities and to study all course materials, so as to be informed of all course academic and administrative actions and policies, and to maximize his/her chance of meeting the objectives of the course.

2. Requirements for students to complete each assessment item satisfactorily:
   The student must obtain at least half of the marks available on each assignment, and at least half of the marks available in the final examination.

3. Penalties for late submission of required work:
   An assignment that is submitted after the due date without an extension approved by the Examiner, will draw a penalty of 20 percent of the available marks for each day (or part thereof) that assignment is late. (e.g., an assignment that is submitted three days will be penalized 60% of the available marks.)

4. Requirements for student to be awarded a passing grade in the course:
   To be assured of a pass in this course, the student must: (1) obtain an overall mark of at least 50%; (2) obtain 50% of the marks available on each of the assignments; (3) obtain at least 50% of the marks available in the examination.

5. Method used to combine assessment results to attain final grade:
   The final grade will be determined by the addition of the marks obtained on each assignment and the examination, weighted as indicated in the Assessment Details.

6. Examination information:
   In a Restricted Examination, candidates are allowed access to specific materials during the examination. The only materials that candidates may use in the restricted examination for this course are: calculators which cannot hold textual information (students must indicate on their examination paper the make and model of any calculator(s) they use during the examination. A list of the materials candidates may use in the examination will be on the front of the examination paper.

7. Examination period when Deferred/Supplementary examinations will be held:
Supplementary examinations are NOT offered in this course. If a deferred exam is granted, it will be held during the examination period at the end of the semester of the next offering of this course.

8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL http://www.usq.edu.au/corporateservices/calendar/part5.htm or in the current USQ Handbook.

ASSESSMENT NOTES

9 The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner.

10 Students must retain a copy of each item submitted for assessment. This must be produced within five days if required by the Examiner.

11 The examiner may grant an extension of the due date of an assignment in extenuating circumstances.

12 The Faculty will normally only accept assessments that have been written, typed or printed on paper-based media.

13 Students who do not have regular access to postal services or who are otherwise disadvantaged by these regulations may be given special consideration. They should contact the examiner of the course to negotiate such special arrangements.

14 A request for a deferred examination will be considered only if the student has obtained a minimum passing grade (50%) on each of the course assignments.
