REQUISITES
Pre-requisite: COU8210 and COU8220

RATIONALE
To become fully aware of the role of the professional psychologist, students need to work within a general psychological practice setting. The placement will require the student to face some of the broader issues that the practising psychologist typically has to deal with in integrating academic learning with professional application. Such interaction should provide a situation in which the student can learn about the function of the discipline of psychology in that setting, the role of other disciplines or professions and something of the professional etiquette involved.

SYNOPSIS
The first placement is designed to provide students with a structured situation in which appropriate counselling and assessment skills can be developed to high levels of competency. It gives the student the opportunity to examine applied problems from a theoretical perspective and to then apply theoretically derived interventions. It promotes a scientist-practitioner model of the professional psychologist. Students will be encouraged to approach applied problems and skill based learning from a hypotheses testing perspective. The emphasis is on skill development in a supervised, structured environment. Expert feedback on performance is seen as an essential feature of the learning process and strong emphasis is placed on regular sessions between the students and their supervisors.

OBJECTIVES
At the end of the placement, students will be able to:
1. demonstrate counselling and assessment competencies;
2. formulate questions to guide further intervention;
3. plan, conduct and evaluate assessment protocols;
4. plan, conduct and evaluate counselling protocols.
