RATIONALE

Professionals involved in vocational and workplace education and training contexts are subject to the effects of significant, dynamic and continual reform. One of the impacts of this reform agenda is an increased need for the construction, implementation and management of learner-centred and client-centred approaches. This impact is compounded through the diverse range of individuals and communities who undertake vocational or workplace studies. Increasingly vocational and workplace training professionals find themselves accountable to the social parameters and aspirations of the local and global community. In such milieu, the performance, interactions and relationships of education and training professionals need to be in concert with contemporary community values. Such values include equity and access, inclusivity, and cultural sensitivity. This course aims at building the capacity of vocational and workplace educationalists in responding to these contemporary and emerging demands.

SYNOPSIS

This course emerges from a platform of enquiry into productive and sustainable pedagogy. Through this platform of exploration, it requires participants to inspect and review their teaching and learning context in relation to current legislation and principles of fairness and equity. The course will introduce and explore notions of culture, ethnicity, difference, disabilities and tolerance. The notion of multiculturalism/pluralism will be explored further, particularly in terms of implications for educational planning and delivery. Practical approaches to responding to 'difference' in the learning environment will be explored. This course aims at building the capacity of VET professionals in establishing connections between social and educational theory and policy to the end of expressing acceptable and sound practice within their educational and community roles.
OBJECTIVES
On completion of this course students will be able to:

- articulate and critique personal positioning or assumptions and alternative views
- demonstrate awareness of the changing role of educators and the changing context in which they may work
- relate educational practices and principles to fairness and equity
- critically discuss the rational for and implementation of inclusive education
- demonstrate the application of strategies and technologies in facilitating inclusive learning environments
- demonstrate an understanding of teaching and learning strategies that embrace 'difference'.
