RATIONALE
It is recognised that many postgraduate students need the opportunity to explore or investigate a topic of their own choosing in order to more closely link their professional interests or needs to their course of studies. Project units are designed to provide such an opportunity.

SYNOPSIS
Students will, under the guidance of a member of staff, pursue an indepth study of a topic relevant to the field of language education, and in particular to the particular focus of the student's major study area. The type of study need not necessarily involve research but should include a substantial investigatory component leading to the submission of a written report. The LIN8011 project would be similar to the one unit LIN8008 Project in purpose and format but there would be an expectation that the student's work would involve a more extensive investigatory component, with a more comprehensive and detailed coverage of the major concepts, issues, and research/professional literature. All student project proposals would be the subject of a critical review and final topics may be the result of extensive lecturer-student negotiation.

OBJECTIVES
On successful completion of this course students will be able to:

1. demonstrate the ability to plan, conduct and report on an investigation of other such scholarly activity focused on an issue or topic of significance in the field of language education.
