SYNOPSIS
Work in organisations is executed mostly in the context of the collective rather than individual efforts that are fragmented - or that is the way it ought to be, rather, according to latest empirical evidence. Organisations are collections of people who come together with some shared purpose. It is hard to miss that the interest in teams and teamwork is continuously growing in organisations. Given this context, this course is designed to allow business leaders and managers to establish and lead teams in their organisations. You will explore the nature of and dynamics involved in teams and teamwork and you'll learn the importance of understanding oneself in the context of being a team-member. There will be opportunity to study aspects of group dynamics that manifest in team-based organisational environments. As participants of this course you'll furthermore be exposed to the challenges faced by managers and leaders who wish to initiate, introduce and develop teams and teamwork in their organisations. You will also be afforded the opportunity to learn about various processes, techniques, tools and skills and practices involved in the context of teams, teamwork and the leadership challenges related thereto.
