RATIONALE
The use of natural areas for tourism activity is widely promoted by government, industry and the community. It is critical that such use is socially, economically and environmentally sustainable. To this end, ecotourism has developed to become an important component of the tourism industry. A high level of management competence and knowledge is necessary to achieve the aims of sustainability for all stakeholders and the environment.

SYNOPSIS
The course begins by defining ecotourism and other related tourism activities. It then provides some historical background to the development of ecotourism in the context of changing paradigms and values in society towards nature and the impacts of human activity. Different market segments are described as well as the range of areas and their suitability for ecotourism, including parks and protected areas, modified and privately owned areas. A number of organisations are described including those specific to ecotourism, plus governments, non-government organisations and accreditation agencies. The impacts of ecotourism are considered as well as research that is necessary to sustain the aims of the industry. Throughout the course case studies of specific places are used to illustrate the main points. Visitor management and interpretation is also considered as well as an overview of global ecotourism. Finally, an overview of ethics and research and how they relate to ecotourism are given.

OBJECTIVES
Completion of this course should enable students to:

1. demonstrate an understanding of the emerging green paradigm, how it differs to the dominant paradigm and the place of ecotourism in this process of change;
2. discuss the various interpretations of 'sustainability' and how these interpretations impact the conduct of tourism activity;
3. describe and define the critical components of ecotourism;
4. differentiate ecotourism from other nature based tourism;
5. describe the main ecotourism markets, and discuss the difficulties in segmenting this market;
6. assess appropriate activity types for the main market segments;
7. assess the suitability of different natural environments for the conduct of the different ecotourism activities;
8. list and describe the IUCN classification for protected areas and assess their use for ecotourism activities;
9. assess the use of modified and private areas for ecotourism;
10.critically assess the potential impacts of ecotourism for a specific area;
11.cite the main bodies associated with international and national Australian ecotourism and how they contribute to the growth and development of the ecotourism industry;
12.analyse the interaction between ecotourism and main stakeholders in specific areas;
13.illustrate the importance of visitor management and interpretation in an ecotourism context;
14.critically assess the results of case studies about ecotourism activities; and
15.describe the current process of quality control for ecotourism and analyse the effect of these programs on sustainability for the natural environment and communities.

NOTES

1. The examination is scheduled to be held in the end-of-semester examination period. Students will be advised of the official examination date after the timetable has been finalised.

IMPORTANT ASSESSMENT INFORMATION

1. Attendance requirements:
   It is the students' responsibility to attend and participate appropriately in all activities (such as lectures, tutorials, laboratories and practical work) scheduled for them, and to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration. If you are an international student in Australia you are advised to attend all classes at your campus. Failure to attend may infringe the conditions of your student visa.

2. Requirements for students to complete each assessment item satisfactorily:
   To complete the assignments satisfactorily, students must obtain at least 50% of the marks available for the assignments in aggregate. To complete the examination satisfactorily, students must obtain at least 50% of the marks available for the examination.

3. Penalties for late submission of required work:
   If students submit assignments after the due date without prior approval then a penalty of 20% of the total marks available for the assignment will apply for each working day late.

4. Requirements for student to be awarded a passing grade in the course:
   To be assured of receiving a passing grade a student must attempt all of the summative assessment items, achieve an aggregated mark of at least 50% in the total marks allocated for the assignments, achieve at least 50% in the examination, and at least 50% of the available weighted marks for the summative assessment items.

5. Method used to combine assessment results to attain final grade:
   The final grades for students will be assigned on the basis of the weighted aggregate of the marks (or grades) obtained for each of the summative assessment items in the course.

6. Examination information:
   This is a closed examination. Candidates are allowed to bring only writing and drawing instruments into the examination.

7. Examination period when Deferred/Supplementary examinations will be held:
   Any Deferred or Supplementary examinations for this course will be held during the next examination period.

8. University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL http://www.usq.edu.au/corporateservices/calendar/part5.htm. Students should also read the Faculty of Business Guide to Policies and Procedures of the Faculty which can be found at the URL http://www.usq.edu.au/handbook/current/buspolproc.html.

**ASSESSMENT NOTES**

1. **Assignments:** (i) The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner. (ii) Students must retain a copy of each item submitted for assessment. This must be produced within 24 hours if required by the Examiner. (iii) The Examiner may grant an extension of the due date of an assignment in extenuating circumstances. Students may apply for an assignment extension either by contacting the Examiner before the due date or by including application with the submitted assignment after the due date. Such applications should be in writing and include supporting documentary evidence. The authority for granting extensions rests with the relevant Examiner. The extension policy for this course tries to be fair to all students who organise their work and family commitments to submit their assignments by the due date, and those few students who cannot do so through unforeseen and uncontrollable circumstances. If an assignment is late, up to one week's extension may be granted if a signed statement with supporting documentation is sent with the assignment proving that an unforeseen and an uncontrollable extenuating circumstance caused the delay, for example, unusual and unpredictable work or family commitments. If this statement and documentation does not show that unforeseen and uncontrollable extenuating circumstance were present for the days claimed, then the normal reduction in marks for a late assignment of 20% per day, will apply. Extensions beyond one week will not be allowed unless express permission is obtained from the Examiner before the date that the assignment is due. (iv) Extensions beyond one week are extremely rare because model answers may start to be distributed to students after one week. The Examiner shall consider all documentary evidence (including statement from a doctor, employer, counsellor or independent member of the course as appropriate) accompanying an application for extension and decide on the outcome. In the case of an application for extension for medical reasons, the documentation should include a statement from a doctor stating: the date the medical condition began or changed; how the condition affected the student's ability to study; when it became apparent that the student could not submit the assignment. In the case of an application for extension for family/personal reasons, the documentation should include a statement from a doctor, counsellor or independent member of the course stating: the date the student's personal circumstances began or changed; how the circumstances affected the student's ability to complete the assignment; when it became apparent that the student could not complete the assignment. In the case of an application for extension for employment-related reasons, the documentation should include a statement from the student's employer stating: the date the student's employment began or the conditions of employment changed; how this prevents the student from completing the assignment.

2. **Course Weightings:** Course weightings of topics should not be interpreted as applying to the number of marks allocated to questions testing those topics in an examination paper.

3. **Word Count for Assignments:** Students must put the 'word count' for their assignment on the front page of the assignment. The word count is the number of words in the body of the assignment report and does not include the title, executive summary, list of
references or appendices. To grade an assignment a marker does not need to read more words than the word limit of the assignment.

4 Text Books: It is the responsibility of the student to acquire a copy of the textbook as soon as their enrolment in the course has been confirmed. Extensions will not be granted on the basis of the student not having a copy of the text, if the text is available from the USQ Bookshop.
