Student contribution band: 2
ASCED code: 020117

STAFFING
Examiner: Richard Watson
Moderator: Ron House

REQUISITES
Pre-requisite: (CSC2401 and ELE1301) or USQIT16

RATIONALE
An operating system is the most fundamental software in computer systems. It not only serves as a resource manager for various kinds of resources such as the central processing unit, memory and disks, but also extends the functionality of the bare computer hardware to support application softwares such as compilers, database systems, window systems and networking. This course covers the design and implementation of all the major components of operating systems. It bridges the knowledge gap between computer architecture and all other software systems and prepares students for the further courses on computer systems such as computer networks and distributed systems.

SYNOPSIS
This course covers the design and implementation of computer operating systems. The major components of operating systems: process management, memory management and file systems are covered in detail. This course uses NACHOS, an instructional operating system developed at the University of California at Berkeley, as the system for case study, laboratory exercises and programming assignments. Students will have experience of design and implementation of a real operating system and a deep understanding of how operating systems work. This course is not offered at Wide Bay in odd years.

OBJECTIVES
On completion of this course students will be able to:

1. understand the basic concepts of operating system components: process and thread, synchronization, file system, memory management and system call implementation;
2. understand the techniques of implementation of the operating system components described above;
3. understand the source code of NACHOS operating system;
4. program modules of basic operating system components.

**TEXT and MATERIALS required to be PURCHASED or ACCESSED**

ALL textbooks and materials are available for purchase from USQ BOOKSHOP (unless otherwise stated). Orders may be placed via secure internet, free fax 1800642453, phone 07 46312742 (within Australia), or mail. Overseas students should fax +61 7 46311743, or phone +61 7 46312742. For costs, further details, and internet ordering, use the 'Textbook Search' facility at http://bookshop.usq.edu.au click 'Semester', then enter your 'Course Code' (no spaces).

Although subject to change, at this stage, it is expected students may require access to Semester 1, Department of Mathematics and Computing DVDROM SET, 2006 (available from the USQ Bookshop). This DVD set contains Semester 1 course material, Windows software and a complete Linux distribution necessary for this course. Although subject to change, at this stage, it is expected students may require access to Semester 2, Department of Mathematics and Computing DVDROM SET, 2006 (available from the USQ Bookshop). This DVD set contains Semester 2 course material, and Windows software relevant to this course. For more information about the DVD sets and their use, please refer to http://www.sci.usq.edu.au/dvdrom and the course web site.

REFERENCE MATERIALS

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

NOTES

1. Examination dates will be available during the Semester. Please refer to the examination timetable when published.

IMPORTANT ASSESSMENT INFORMATION

1 Attendance requirements:
   It is the students' responsibility to attend and participate appropriately in all activities (such as lectures, tutorials, laboratories and practical work) scheduled for them, and to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.

2 Requirements for students to complete each assessment item satisfactorily:
   To complete each of the assessment items satisfactorily, students must obtain at least 50% of the marks available for each assessment item.

3 Penalties for late submission of required work:
   If students submit assignments after the due date without prior approval then a penalty of 10% of the total marks gained by the student for the assignment will apply for each day late.

4 Requirements for student to be awarded a passing grade in the course:
   To be assured of receiving a passing grade a student must submit all of the summative assessment items, achieve at least 50% in the examination and at least 50% of the available marks for the summative assessment items.
5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the aggregate of the weighted marks obtained for each of the summative assessment items in the course.

6 Examination information:
In a Closed Examination, candidates are allowed to bring only writing and drawing instruments into the examination.

7 Examination period when Deferred/Supplementary examinations will be held:
Any Deferred or Supplementary examinations for this course will be held during the examination period at the end of the semester of the next offering of this course.

8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL http://www.usq.edu.au/corporateservices/calendar/part5.htm or in the current USQ Handbook.

ASSESSMENT NOTES

9 The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner.

10 Students must retain a copy of each item submitted for assessment. If requested, students will be required to provide a copy of assignments submitted for assessment purposes. Such copies should be despatched to USQ within 24 hours of receipt of a request being made.

11 In accordance with University policy, the Examiner may grant an extension of the due date of an assignment in extenuating circumstances.

OTHER REQUIREMENTS

1 Students will require access to e-mail and internet access to USQConnect and the Course home page for this course.

2 Students will be granted a deferred examination only if they perform satisfactorily in all other assessment items.
