RATIONALE

Behaviour management is widely acknowledged as a major concern of educators, and is ranked by practitioners, novice and experienced, along with catering for student diversity, as their most significant professional challenge. Likewise, both state and private employing authorities have recognised the importance of behaviour management in the teaching-learning process, by identifying it as a priority in teacher education and in resource allocation. In the initial preparation of educators, behaviour management is broadly regarded as a core skill, essential to effective practice and positive student-educator relations.

SYNOPSIS

In this course preservice educators are introduced to a wide range of models, methods and strategies for managing student behaviour, with particular attention given to the management of students who exhibit behavioural and adjustment problems. The underlying theoretical basis of each approach is examined, along with a critical review of its efficacy and appropriateness in early childhood and primary school contexts. Due regard is also given to the congruence between current policies on student behaviour and the procedures recommended in each of the approaches covered. Support
is provided in the process of developing a personal approach to the management of student behaviour.

**OBJECTIVES**

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On completion of this course students will be able to:

ASSESSMENT NOTES

1. The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the examiner.

2. Students must retain a copy of each item submitted for assessment. This must be produced within twenty-four (24) hours of receipt of request being made by the examiner. The student must retain this copy until the grade for this course has been finalised.

3. In accordance with the University's assignment extension policy (Regulation 5.6.1), the examiner may grant an extension of the due date of an assignment in extenuating circumstances.

8. Marking criteria are provided in course material as mark sheets/guides or as part of assignment specifications.

9. Summative assessment items will receive a numerical score.
