RATIONALE
Recent changes in orientation to school and leadership have prompted a change in emphasis on what is seen to be legitimate activity for curriculum leaders. The increasing emphasis on self-management of schools and devolution of authority from central offices and the resultant growth in school-based decision making has resulted in school community involvement and responsibility for financial planning and expenditure, the control of professional development programs, collaborative planning and curriculum decision making processes. These changes have resulted in changing roles and responsibilities for those tasked with the management and development of school programs. The required skill and knowledge base of pedagogical curriculum leadership in Australia has changed dramatically as a result of this evolution of administrative practice.

SYNOPSIS
This course examines the required skill and knowledge base of pedagogical and curriculum leadership and focuses upon those skills and practices seen to be appropriate for educational leaders attempting to meet the challenges of a rapidly changing school environment. In particular, the course explores the knowledge and skills required for school-based curriculum development and evaluation. It also explores knowledge and understanding of the processes of curriculum leadership within schools of the 21st century.
OBJECTIVES
The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On successful completion of this course students will be able to:

1. Identify major sources of influence and control on the curriculum. (Assignment 1)
2. Examine the role of the curriculum and pedagogical leader as facilitator. (Assignment 1)
3. Consider the functions of planning, motivating, communicating, and organising in pedagogical leadership. (Both Items)
4. Recognise the value of data collection, needs assessment, curriculum evaluation, team management and action research to effective curriculum management. (Assignment 2)
5. Expand understanding, knowledge and experience in the processes of curriculum management and pedagogical leadership. (Assignment 2)
