RATIONALE
At all levels of education and training the roles of the instructor/ teacher include input into the development of the courses for which they have some responsibility. Effective development of curricula requires a sound understanding of the elements of curriculum design, the sources from which they are drawn and the processes involved in the analysis of sources and the manipulation of elements. Those involved in this development need to have detailed knowledge and well developed skills that relate to the issues focusing on the selection, modification and development of courses and their components.

SYNOPSIS
This course focuses on the development of skills, knowledge and attitudes which are involved in the process of curriculum development. It is assumed that students will have above working knowledge of curriculum development. The course involves an analysis of a context into which a course is to be introduced as well as an extensive review of the literature relating to the most appropriate objectives, content, strategies and assessment/evaluation techniques to be incorporated into the proposed program. The actual exercise selected as the practical basis of the course may involve the modification of existing materials, the selection of the most appropriate materials from among competing packages or the development of an entirely new curriculum from first principles.
OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On successful completion of this course students will be able to:

1. conduct a contextual evaluation to establish the need for a modification to the instructional program with which they are currently working (Assignment 1)
2. conduct an in depth input evaluation to establish the most appropriate means of structuring, presenting and assessing/evaluating the proposed instructional program (Assignment 1)
3. develop a program based on the context and input evaluations which displays a knowledge of the importance of each element of curriculum design and the relationships between the elements (Assignment 2)
4. appreciate the role of academic and professional debate as it relates to the development of curricula. (Assignment 2)

ASSESSMENT NOTES

1 The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner.

2 Students must retain a copy of each item submitted for assessment. This must be produced within twenty-four (24) hours of receipt of request being made by the Examiner. The student must retain this copy until the grade for this course has been finalised.

3 The Examiner may grant an extension of the due date of an assignment in extenuating circumstances.

4 In the event that a due date for an assignment falls on a local public holiday in their area, the due date for the assignment will be the next working day. Students are to note on the assignment cover the date of the public holiday for the Examiner's convenience.

5 Students who have undertaken all of the required assessments in a course but who have failed to meet some of the specified objectives of a course within the normally prescribed time may be awarded the temporary grade: IM (Incomplete - Make up). An IM grade will only be awarded when, in the opinion of the Examiner, a student will be able to achieve the remaining objectives of the course after a period of non-directed personal study.

6 Students who, for medical, family/personal, or employment-related reasons, are unable to complete an assignment or to sit for an examination at the scheduled time may apply to defer an assessment in a course. Such a request must be accompanied by appropriate supporting documentation. One of the following temporary grades may be awarded IDS (Incomplete - Deferred Examination); IDM (Incomplete - Deferred Make-up); IDB (Incomplete - Both Deferred Examination and Deferred Make-up).

7 When there is more than one marker for a single item of assessment, the distributed patterns and means for the different markers will be compared and marks adjusted if necessary.

8 The Faculty will normally only accept assessments that have been written, typed or printed on paper-based media. The Faculty will NOT accept submission of assignments by facsimile. Students who do not have regular access to postal services or who are otherwise disadvantaged by these regulations may be given special consideration. They should contact the Examiner of the course to negotiate such special arrangements.
9 Marking criteria are provided in course material as mark sheets/guides or as part of assignment specifications.

10 Summative assessment items will receive a numerical score. Any ungraded assessment requirement will receive a Pass, Fail or Incomplete.
