OTHER REQUISITES

RATIONALE
Teachers today are faced with an increasingly diverse student enrolment. Of particular concern are those children who have difficulty learning or otherwise adjusting to the demands of the school and its curriculum. Into this category would fall low performing and underachieving children, children with disabilities, children from culturally different backgrounds, and 'at risk’ children, those whose family and/or environmental circumstances have changed or are such that they might result in the child experiencing learning or behavioural problems. The demands on teachers to meet the needs of these children can be great, and will invariably tax teachers professional skill and commitment. A particular concern of teachers are the behavioural problems posed by many of these children. It is becoming increasingly recognised that teachers need specific knowledge and skills in behaviour management to respond effectively to the problems posed by such children.

SYNOPSIS
In this course students are introduced to a wide range of methods and strategies for meeting the needs of children with behaviour and adjustment problems in regular preschool, primary and secondary classrooms. The course explores research on teaching and defines what is currently known about how to effectively teach children with special needs with a particular emphasis on maintaining student attention and on-task behaviour. First, basic classroom teaching and management skills and procedures are covered. Secondly, more comprehensive methods and strategies known to impact positively on children with special needs are introduced. The current focus is on cooperative learning strategies and peer tutoring. The major proportion of the course...
will be devoted to behavioural management strategies, including the Kounin model, behaviour modification, assertive discipline, reality therapy, logical consequences, and social skills training.

OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On successful completion of this course students will be able to:

1. define and discuss several major approaches to behaviour management (Assignment 1)
2. define and describe preventive and corrective management (Assignment 1)
3. describe and discuss the major features of eight key models of behaviour management (Both assessment items)
4. develop and justify a personal model of behaviour management drawing on features of the eight key models introduced in the course. (Assignment 2)

ASSESSMENT NOTES

1. The due date for an assignment is the date by which a student must despatch the assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the examiner.

2. Students must retain a copy of each item submitted for assessment. This must be produced within twenty-four (24) hours of receipt of request being made by the examiner. The student must retain this copy until the grade for this course has been finalised.

3. In accordance with the University's assignment extension policy (Regulation 5.6.1), the examiner may grant an extension of the due date of an assignment in extenuating circumstances.
