RATIONALE
An understanding of the principles of Australian income taxation and company law are important to any person in business or providing accounting or financial services to business and to those seeking to practice as professional accountants. There would be no major business decision in Australia made without regard to the taxation implications. Similarly, in a corporate environment all major decisions would include a consideration of relevant company law issues.

SYNOPSIS
This course introduces students to the principles underlying the taxation of income and provides an appraisal of the operation of company law in Australia. Topics covered include the determination of assessable income, allowable deductions, capital gains tax, goods and services tax, calculation of tax payable, taxation of business entities, tax administration, and the general structure and principles of company law.

OBJECTIVES
The course objectives define the student learning outcomes for a course. The assessment item/s that may be used to assess student achievement of an objective is/are shown in parentheses after each objective. On successful completion of this course, students should be able to:

1. describe the legislative regulatory framework established by the Corporations Act (Assignment 1)
2. describe certain principles of company law and how that law applies to key areas of accounting practice (Assignment 1)
3. identify the fundamental concepts associated with the taxation of income in Australia (Assignment 2, Examination)
4. explain the operation of Australian income tax legislation, decided cases and other tax authorities in determining a taxpayer's liability to taxation (Assignment 2, Examination)
5. apply the principles of taxation to factual situations (Assignment 2, Examination)
6. identify and explain the legislative framework of goods and services tax in Australia and apply the law and factual situations (Assignment 2, Examination).
