OTHER REQUISITES
State law in Queensland (Australia) requires that all adults working/undertaking professional experience/researching with children under the age of 18, in the state of Queensland are required to possess a current suitability card (Blue Card). (See "Other Requirements" for further information.)
Also see: http://www.childcomm.qld.gov.au/employment/bluecard/informationSheets.html

RATIONALE
Teachers of second languages need to have a theoretical framework which would enable them to evaluate their activities in the classroom more effectively. While in practice it is possible to find that an activity that is theoretically ineffective can be effective through teacher or other factors operating in the classroom, nevertheless to be able to teach creatively in the classroom, teachers need to know why something they do in the classroom works. No teacher operating in the classroom does so without some sort of theory of teaching, however rudimentary it might be. This course attempts to provide teachers with a coherent theory of second language learning.

SYNOPSIS
The course emphasises recent research in second language acquisition and the theoretical issues underlying such research. The course looks at the following topics: (a) various approaches to assessing and describing learner language; (b) the notion of "interlanguage"; (c) the question of transfer from first language in SLL; (d) cognitive processes and strategies involved in second language learning and communication; (e) individual learner characteristics, learning and environment; (f) social and cultural factors affecting L1 and L2 use; (g) consideration of the implications of SL learning research and theory for language teaching.
OBJECTIVES

The course objectives define the student learning outcomes for a course. The assessment item(s) that may be used to assess student achievement of an objective are shown in parenthesis. On successful completion of this course students will be able to:

1. critically discuss the similarities and differences between first and second language acquisition; (Assignment and Reflective Journal)
2. identify and discuss the different ways that learner language can be assessed and described by discussing key concepts such as "interlanguage", "language learner language", "error analysis"; (Assignment and Reflective Journal)
3. discuss the reasons for variability that exists in language learner language and give examples of different types of variability; (Assignment and Reflective Journal)
4. read more effectively research articles in SL journals; (Assignment; Take Home Exam and Reflective Journal)
5. critically discuss the strengths and weaknesses of various current SLA theories and identify elements in them that can be used in classroom; (Take Home Exam)
6. identify the different types of communication strategies and assess their use in classroom; (Take Home Exam)
7. develop some understanding of cognitive styles and be able to discuss the implications of learning styles for classroom teacher practice; (Take Home Exam)
8. enumerate various types of learning strategies and critically discuss their role in SL learning; (Take Home Exam)
9. identify the different types of individual differences and their putative effect upon the rate of SL learning; (Take Home Exam)
10. develop a framework for a more analytic approach to SL classroom practices. (Assignment; Take Home Exam)
11. Demonstrate competence in scholarly writing including spelling, grammer, punctuation and bibliographic referencing (Assignment and Take Home Exam)
