SYNOPSIS
All students undertaking graduate studies in Business need to appreciate and understand the nature of organisational behaviour. They should also be able to articulate behavioural issues in business situations. This course provides a framework in which students are exposed to a range of theories and experiences within the field of organisational behaviour which will allow them to further develop insights, attitudes and skills to a level consistent with the expectations for senior management. The course aims to provide an understanding of the behaviour of people at work. It analyses behaviour at the individual, group and organisational levels. Managers must understand the complex interactions that influence the effectiveness of different management strategies and organisational structures under different environmental and technological conditions. As well as reviewing the current theories and research in the area, the course uses case studies to examine the implications for practising managers.

OBJECTIVES
The course objectives define the student learning outcomes for a course. The assessment item/s that may be used to assess student achievement of an objective is/are shown in parentheses after each objective. On successful completion of this course, students should be able to:

1. describe and analyse the foundations of individual behaviour and its impact upon work organisations (Assignment)
2. critique motivation and job design as determinants of employee satisfaction and performance (Assignment)
3. evaluate how groups and teams develop and function, and how group dynamics affect performance (Assignment)
4. explain and apply the various styles of leadership and conflict management (Examination)
5. appraise the relationship between organisational structure and the internal and external environment (Examination)
6. analyse how organisational effectiveness is influenced by factors such as power, control, climate and culture (Examination)
7. describe and evaluate the process of organisational change and identify and apply strategies for organisational development (Examination)
