Examiner: Lorelle Burton
Moderator: Tony Machin

REQUISITES
Pre-requisite: PSY1010 and PSY2100

OTHER REQUISITES
Recommended Pre-requisite: PSY1020 and PSY3010

RATIONALE
The field of individual differences is concerned with ways that people differ psychologically and how these variations might be conceptualised and measured. This course is designed to provide students with an understanding and appreciation of individual differences in functions that are central to human nature, such as personality. An appreciation of the different aspects of personality and its functions will help to explain the diversity of human behaviour across settings such as education, industry, and life in general.

SYNOPSIS
This course is designed to cover the main theoretical approaches to the study of individual differences and to critically examine research findings in this area. The focus of the course is on developing an integrated picture of the whole person through understanding of the major facets of personality and how these work together to shape behaviour. Subject matter covered includes theories of personality, measures of personality, and applications to individual differences. Apart from covering the eight basic aspects of personality, the course will challenge the student to think about the complexity of human nature, learning how to evaluate assumptions, theories, and research.

OBJECTIVES
On completion of this course, students will be able to:
1. understand current and recurring issues in the measurement and assessment of personality (Assessment 1, 2, and 3);
2. outline and contrast the eight basic aspects of personality (Assessment 1, 2, and 3);
3. critically evaluate the research literature in personality theory (Assessment 2 and 3);
4. debate issues related to the notion of gender-based psychological differences (Assessment 3);
5. critically examine the relations among personality, stress, adjustment, and health (Assessment 3);
6. discuss the influence of culture on personality (Assessment 3);
7. discuss the personality of hate and the personality of love (Assessment 3);
8. appreciate future trends in the study of personality (Assessment 3);
9. apply the style and format requirements outlined in the latest edition of the Publication Manual of the American Psychological Association (APA) (Assessment 2).

TEXT and MATERIALS required to be PURCHASED or ACCESSED

ALL textbooks and materials are available for purchase from USQ BOOKSHOP (unless otherwise stated). Orders may be placed via secure internet, free fax 1800642453, phone 07 46312742 (within Australia), or mail. Overseas students should fax +61 7 46311743, or phone +61 7 46312742. For costs, further details, and internet ordering, use the 'Textbook Search' facility at http://bookshop.usq.edu.au click 'Semester', then enter your 'Course Code' (no spaces).

REFERENCE MATERIALS

Reference materials are materials that, if accessed by students, may improve their knowledge and understanding of the material in the course and enrich their learning experience.

NOTES

1. Examination dates will be available during the Semester. Please refer to the examination timetable when published.
2. Examination dates will be available during the Semester. Please refer to the examination timetable when published.

IMPORTANT ASSESSMENT INFORMATION

1 Attendance requirements:
   It is the student's responsibility to study all material provided to them or required to be accessed by them to maximise their chance of meeting the objectives of the course and to be informed of course-related activities and administration.

2 Requirements for students to complete each assessment item satisfactorily:
   To satisfactorily complete an assessment item a student must achieve at least 50% of the marks or a grade of at least C-. Students do not have to satisfactorily complete each assessment item to be awarded a passing grade in this course. Refer to Statement 4 below for the requirements to receive a passing grade in this course.

3 Penalties for late submission of required work:
   If students submit assignments after the due date without prior approval then a penalty of 10% of the total marks available for the assignment will apply for each working day late.

4 Requirements for student to be awarded a passing grade in the course:
   To be assured of receiving a passing grade a student must achieve at least 50% of the total weighted marks available for the course.

5 Method used to combine assessment results to attain final grade:
   Final grades for students will be determined by the addition of the marks obtained in each assessment item, weighted as in the Assessment details and by considering the students' level of achievement of the objectives of the course.

6 Examination information:
   In a Restricted Examination, candidates are allowed access to specific materials during the examination. The only materials that candidates may use in the restricted examination for this course are: writing materials (non-electronic and free from material which could give the student an unfair advantage in the examination); calculators which cannot hold textual information (students must indicate on their examination paper the make and model of any calculator(s) they use during the examination; English translation dictionaries (but not technical dictionaries); Formula sheets; Translation dictionary. With the Examiner's approval, candidates may, take an appropriate non-electronic translation dictionary into the examination. This will be subject to perusal and, if it is found to contain annotations or markings that could give the candidate an unfair advantage, it may be removed from the candidate's possession until the appropriate disciplinary action is completed.

7 Examination period when Deferred/Supplementary examinations will be held:
   Students who, for medical family/personal, or employment-related reasons, are unable to sit for an examination at the scheduled time may apply to defer an assessment in a course. Such a request must be accompanied by appropriate supporting documentation. Students will be granted a deferred examination only if they perform satisfactorily in all other assessment items. Any deferred examinations for this course will be held during the examination period at the end of the semester of the next offering of this course.

8 University Regulations:
   Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL http://www.usq.edu.au/corporateservices/calendar/part5.htm or in the current USQ Handbook.
ASSESSMENT NOTES

9 The due date for an assignment is the date by which a student must despatch an assignment to the USQ. The onus is on the student to provide proof of the despatch date, if requested by the Examiner. Students must retain a copy of each item submitted for assessment. This must be produced within five days if required by the Examiner.

10 As there are resources cited in the Study Materials that are available of the World Wide Web, and a discussion group that will be used throughout the course, students undertaking this course will require access to email and Internet access to USQConnect to enable them to participate fully in the course.

11 The examiner may grant an extension of the due date of an assignment in extenuating circumstances. You do not need to request an extension from the Examiner if you submit your assignment within one week of the due date. However, you still need to provide a written statement explaining why you are not submitting your assignment on the original due date. Assignments submitted more than one week after the due date, without an extension approved by the Examiner, will attract a penalty of 10 percent of the total marks available for the assignment for each working day (or part thereof) that the assignment is late. Extensions will usually not be granted for workload reasons unless it can be shown that your work commitments prior to the due date for the assignment were above and beyond your normal duties or responsibilities. In such cases, a letter from your employer would be required. If you think you have grounds for an extension, you must apply in advance. A covering letter and appropriate documentation must be submitted with the assignment. No assignments will be accepted after marked copies have been returned to students.

12 As there are resources cited in the Study Materials that are available on the World Wide Web, and a discussion group that will be used throughout the course, it is highly recommended that students undertaking this course have access to computer and Internet facilities which will enable them to participate fully in the course.

13 Students will be granted a deferred examination only if they perform satisfactorily in all other assessment items.
