REQUISITES
Pre-requisite: PSY8045

RATIONALE
Many preventable causes of acute and chronic illness and premature death are associated with lifestyle and environment, rather than biological and physiological inadequacy. Also, the well being of individuals already suffering from acute and chronic illness can be enhanced with psychological assistance in managing psychological aspects of symptoms and medical treatments. In order to address lifestyle-related health issues and psychological aspects of chronic and acute illness management, practitioners need to understand the biopsychosocial factors in health.

SYNOPSIS
This course will examine biopsychosocial factors associated with mortality and morbidity in the Australian culture. It will consider research and theory relevant to health and lifestyle-related behaviour. A range of health attitudes and behaviour assessment methods and interventions will be surveyed and students will use several of these in practice sessions. This course will be offered through three two-day compulsory workshops on-campus, each of two days duration.

OBJECTIVES
On successful completion of this course students will be able to demonstrate the following competencies identified by the APS Competencies for Psychologists (1996) and the competency document for the College of Health Psychologists and Clinical Psychologists. Specifically they will be able to:

1. demonstrate an understanding of the most important biopsychosocial causal factors in the origins of most common health problems (Assessed in Assignment 1 and Exam);
2. appropriately select from and implement a range of assessment strategies relevant to these problems (Assessed in Assignment 1 and Exam);
3. identify and assess the relationship between health attitudes and health behaviours (Assessed in Assignment 1 and Exam);
4. demonstrate an understanding of the links between stress, coping and support systems (Assessed in Assignment 1 and Exam);
5. appreciate gender and cross cultural aspects of health related behaviour and attitudes (Assessed in Assignment 1 and Exam).
6. understand and implement strategies of motivational interviewing (Assessed in Video and Exam)
7. understand and implement strategies for facilitating attitudes, beliefs and behaviour related to pain management (Assessed in Video and Exam)

### NOTES

1. The 3 Hour Closed In-Class Test will be given on Day 2 of Workshop 3.
2. On-campus Workshops will be held for two days on three occasions during the semester. Students should consult the Department of Psychology website for the 2007 schedule.
3. Workshop 2
4. Workshop 3

### IMPORTANT ASSESSMENT INFORMATION

1. **Attendance requirements:**
   Participation in On-campus Workshops. The skills components of this course will be taught in three, two-day compulsory workshops held on campus. During these workshops, students will engage in practice of techniques for a variety of assessments. These are essential prior to completion of the assessment reports. If circumstances prevent a student from attending a workshop, the student must contact the examiner to arrange an alternative activity. Attendance at the three workshops and/or completion of one or more alternative activities at a standard judged to be appropriate by the examiner is required before the 1 mark for the workshops can be awarded.

2. **Requirements for students to complete each assessment item satisfactorily:**
   To complete each of the assignments satisfactorily, students must obtain at least 50% of the marks available for each assignment. To complete the examination satisfactorily, students must obtain at least 50% of the marks available for the examination.

3. **Penalties for late submission of required work:**
   No late penalties.

4. **Requirements for student to be awarded a passing grade in the course:**
To be assured of a passing grade, students must achieve at least 50% in all of the weighted assessment items and at least 50% of the total weighted marks available for the course and demonstrate satisfactory competence in the motivational interviewing and pain assessment and management videos.

5 Method used to combine assessment results to attain final grade:
The final grades for students will be assigned on the basis of the weighted aggregate of the marks obtained for each of the summative assessment items in the course.

6 Examination information:
In a Closed Examination, candidates are allowed to bring only writing and drawing instruments into the examination.

7 Examination period when Deferred/Supplementary examinations will be held:
Any Deferred or Supplementary examinations for this course will be held in the fourth week of the semester following this course offering and the examiner will advise students involved in writing of the date time and location of any such examination.

8 University Regulations:
Students should read USQ Regulations 5.1 Definitions, 5.6. Assessment, and 5.10 Academic Misconduct for further information and to avoid actions which might contravene University Regulations. These regulations can be found at the URL http://www.usq.edu.au/corporateservices/calendar/part5.htm or in the current USQ Handbook.

ASSESSMENT NOTES

9 Students must retain a copy of each item submitted for assessment. This must be produced within 24 hours if required by the Examiner.

10 The examiner may grant an extension of the due date of an assignment in extenuating circumstances.

11 Students will require access to e-mail and internet access to USQConnect for this course.

12 Client Assessment Report 1. Each student will interview a 'volunteer client' regarding a particular acute health issue, such as physical injury, surgery, etc, or a lifestyle issue such as lack of exercise, poor diet, smoking, etc. The student will integrate data from the interview and from appropriate formal assessments to write a report on the psychological factors contributing to the person's health problem and possibly affecting the efficacy of a psychological intervention. The report will be approximately 1,500 words.

13 Motivational Interviewing and Pain Assessment and Intervention videos. Students will engage a 'volunteer client' to demonstrate a 45 minute session of motivational interviewing and a 45 minute video of pain assessment and intervention. Viewing of these videos will occur during workshops or other tutorial sessions organised by the lecturer.
