Program focus

The Graduate Diploma of Information Technology provides professional qualifications in computing for graduates from disciplines other than computing or information systems.

Professional accreditation

This program is accredited at Associate level by the Australian Computer Society and, through the Seoul Accord, is recognised in other countries.

Program aims

The Graduate Diploma of Information Technology will provide additional professional qualifications in computing for graduates from disciplines other than Computing. It is a vocationally and academically oriented program emphasising the resolution of technological problems leading to the effective management and analysis of information in both private and public sectors. Graduates should have a strong understanding of relevant major academic disciplines and possess knowledge and skills in problem resolution that will enable them to work effectively in their chosen area or specialisation.

Achievement of the objectives of the student's area of specialisation will result in a graduate of high academic standard who is capable of competing for employment in a chosen professional area and pursuing career development in that or other related areas.

Program objectives

The objectives of the Graduate Diploma of Information Technology are to enable graduates to:
● work as a professional in the Information Technology industry
● acquire specific knowledge and skills in information technology which are relevant to their disciplines and careers
● become better problem-solvers and innovative thinkers, who are able to learn new skills independently and efficiently and consequently to succeed in a competitive professional environment
● identify information needs appropriate to their area of specialisation, and apply the techniques required to gather and interpret such information
● demonstrate skills in the analysis and determination of technological issues at management level
● identify, analyse and solve problems in one or more areas of technology by selecting and using either quantitative or qualitative techniques appropriate to the resolution of technological problems
● satisfy academic admission requirements for membership of relevant professional bodies
● understand and act within the ethics of their profession and the need for a commitment to that profession.

**Admission requirements**

Entrants to the Graduate Diploma of Information Technology must either:

● hold a Bachelor's degree from an Australian university in a non-computing discipline, or
● hold a degree of a recognised university in a non-computing discipline, or
● with approval from the program coordinator, qualification or relevant work experience at least equivalent to one of the above.

**International Applicants**

International applicants must have met the University's English language requirements or have completed the University's ELICOS/EAP programs.

**How to apply**

**Domestic students**

Application for postgraduate programs may be made directly to USQ.

**International students**

This program is offered to international students. An international student is a person who is not an Australian or New Zealand citizen and not an Australian permanent resident. Please refer to USQ International for information about entry requirements, visa arrangements and how to apply.

**Program fees**

**Domestic full fee paying place**

Domestic full fee paying places are funded entirely through the full fees paid by the student. Full fees vary depending on the courses that are taken. You are able to calculate the fees for a particular course via the Course Fee Finder.

Domestic full fee paying students may be eligible to defer their fees through a Government loan called FEE-HELP provided they meet the residency and citizenship requirements.

Australian citizens, Permanent Humanitarian Visa holders, Permanent Resident visa holders and New Zealand citizens who will be resident outside Australia for the duration of their program pay full tuition fees and are not eligible for FEE-Help.

**International full fee paying place**

International students pay full fees. Full fees vary depending on the courses that are taken and whether they are studied on-campus, via distance education/online. You are able to calculate the fees for a particular course via the Course Fee Finder.
Program structure
The Graduate Diploma consists of eight courses each of one unit. The following four compulsory courses must be completed:

- CIS1000 Information Systems Concepts
- CSC1401 Foundation Programming
- CSC2407 Introduction to Software Engineering
- MAT1101 Discrete Mathematics for Computing

The remaining four courses must be chosen from the following list. At least two courses must be from Level Three.

Enrolment requirements should be taken as a guide to the assumed knowledge required for the course. It is the student’s responsibility to ensure that they have the assumed knowledge for a course before enrolling in that course.

Required time limits
Students have a maximum of 3 years to complete this program.

IT requirements
Students should visit the USQ minimum computing standards to check that their computers are capable of running the appropriate software and versions of Internet web browsers and to check the minimum and recommended standards for software.

Recommended enrolment pattern
There is no recommended enrolment pattern for this program. Students should select their own, keeping in mind any course pre-requisites and the requirements to graduate outlined above in the Program Structure. If unsure about a suitable enrolment pattern, students should contact the Program Coordinator.
