Program aims

The Bachelor of Agricultural Technology and Management (BATM) will produce job ready graduates who have the expertise and practical skills to apply and develop new and emerging agricultural technologies in both crop and animal production settings, and deliver outcomes that are safe, effective and financially and environmentally sustainable to address industry needs.

Program objectives

On completion of this program, students should be able to:

- Evaluate, adapt and utilise knowledge and skills that underpin the agricultural production sector, including knowledge of emerging agricultural technologies, agricultural science, data science and business management to achieve key outcomes.
- Evaluate operational management of agricultural production systems and identify opportunities for system enhancement through the integration of new and emerging technologies.
- Communicate effectively across a diverse range of stakeholders using oral, written and technology-based approaches and work effectively across multidisciplinary teams within the agricultural production sector.
- Integrate and apply discipline expertise to address production, financial, environmental and social challenges within the agricultural production system.
- Appraise systems in agricultural production, operations and their associated supporting technologies and make informed decisions to ensure their use in an efficient and safe manner.
- Engage in lifelong learning through reflection, self-education and professional development, and be accountable for their personal and professional actions by managing personal performance.

- Make guided judgements in their professional practice when identifying and responding to cultural, ethical and social issues including those relevant to indigenous peoples and those of diverse cultures and backgrounds.

Australian Qualifications Framework

The Australian Qualifications Framework (AQF) is a single national, comprehensive system of qualifications offered by higher education institutions (including universities), vocational education and training institutions and secondary schools. Each AQF qualification has a set of descriptors which define the type and complexity of knowledge, skills and application of knowledge and skills that a graduate who has been awarded that qualification has attained, and the typical volume of learning associated with that qualification type.

This program is at AQF Qualification Level 07. Graduates at this level will have broad and coherent knowledge and skills for professional work and/or further learning.

The full set of levels criteria and qualification type descriptors can be found by visiting www.aqf.edu.au.

Program Information Set

View USQ's admission criteria, student profiles and a summary of all offers made under [Course Admission Information Set](#) via the QTAC website.

Admission requirements

To be eligible for admission, applicants must satisfy the following requirements:

- Have achieved a minimum Australian Tertiary Admission Rank (ATAR) of **65.6**, or equivalent qualification.[^]
- English Language Proficiency requirements for Category 2.

Applicants are advised to also address the following:

- Assumed knowledge expectations: English and General Mathematics (Units 3 & 4, C) or equivalent.
- Recommended Prior Study: One of Agricultural Science, Biological Science, Chemistry or Physics (Units 3 & 4, C) or equivalent.

All students are required to satisfy the applicable [English language requirements](#).

If students do not meet the English language requirements they may apply to study a University-approved [English language program](#). On successful completion of the English language program, students may be admitted to an award program.

[^] These are determined by the University for specific programs each Semester. The 2021 ATAR and tertiary entrance ranks are based on agreed QTAC schedules which assess formal study at Year 12 or [equivalent level](#), tertiary, preparatory, professional or vocational qualifications or work experience, as detailed in the QTAC Assessment of Qualifications Manual and QTAC Assessor Guidelines.

Adjustment factors may help you get into the program of your choice by increasing your entrance rank. The additional points don't apply to all applicants or all programs. Please read the information about USQ's [Adjustment Factors](#) carefully to find out what you may be eligible for.

Program fees

Commonwealth supported place

A Commonwealth supported place is where the Australian Government makes a contribution towards the cost of a students' higher education and students pay a [student contribution amount](#), which varies depending on the courses undertaken. Students are able to calculate the fees for a particular course via the [Course Fee Schedules](#).

Commonwealth Supported students may be eligible to defer their fees through a Government loan called [HECS-HELP](#).

International full fee paying place

International students pay full fees. Full fees vary depending on the courses that are taken and whether they are studied on-campus, via distance education/online. Students are able to calculate the fees for a particular course via the [Course Fee Schedules](#).

Program structure

The program consists of 24 units comprised of:

- five core courses (2 courses worth 0.5 units each)
- Production Technology 12-unit extended major

And a choice of:

- eight units of Electives;
- Two 4-unit Minors from: Agricultural Systems, Animal Production, Computing, Crop Production, Data Analytics, Food Technology or Geographic Information Systems;
- One 4-unit Minor from: Agricultural Systems, Animal Production, Computing, Crop Production, Data Analytics, Food Technology or Geographic Information Systems and four units of Electives.

Program completion requirements

Students must satisfactorily complete 24 credit points of units of which a maximum of 10 units are level 1 courses and a minimum of 7 units are level 3 courses.

Some courses have mandatory attendance requirements.

Required time limits

Students have a maximum of 9 years to complete this program.

Core courses

The courses that comprise the core studies program are shown in the following table:

Course Name and Code	Semester(s) Offered			
	Toowoomba	Springfield	External	Online
Core Courses				
AGR1109 Professionalism in Agriculture *	1,2			1,2
AGR2109 Practical Investigations in Agricultural Technology	1,2		1,2	
AGR2209 Innovation and Entrepreneurship in Agriculture*	2			2
AGR3109 Agricultural Technology Industry Placement	1,2		1,2	
AGR3209 Agricultural Technology and Management Project	1,2			1,2

Footnotes

* 0.5-unit course

Production Technology Extended 12-unit Major courses

Course Name and Code	Semester(s) Offered			
	Toowoomba	Springfield	External	Online
Major Courses				
STA1003 Fundamental Statistics	1,2	2		1,2,3
CSC1401 Foundation Programming	1,2,3	1,2		1,2,3
GIS1402 Geographic Information Systems	1	1		1,3
SVY1110 Introduction to Global Positioning System	2	2		2
AGR1104 Farm Safety and Operations 1*	1		1	
AGR2104 Farm Safety and Operations 2*	1,2		1,2	
AGR2302 Agricultural Machinery	1			1
AGR2202 Instrumentation and Automation in Agriculture	2		2	
AGR2008 Business Principles for Agriculture				2
AGR3305 Precision and Smart Technologies in Agriculture	2			2
AGR3105 Smart Data Farming	1			1
LAW3600	1			1
AGR3302 Sensors and Technology in Animal Production	2			2

Footnotes

* 0.5-unit course

Minor Studies

A minor study is a coherent group of four units of courses that provides students with an additional breadth of study in their program.

Before undertaking any course or minor, students should ensure that all enrolment requirements are satisfied.

The following [minor studies](#) are available in the Bachelor of Agricultural Technology and Management:

- [Agricultural Systems](#)
- [Animal Production](#)
- [Computing](#)
- [Crop Production](#)
- [Data Analytics](#)
- [Food Technology](#)
- [Geographic Information Systems](#)

IT requirements

Students should visit the USQ minimum computing standards to check that their computers are capable of running the appropriate software and versions of Internet web browsers and to check the minimum and recommended standards for software.

Other program requirements

This program requires students to work with animals and in outdoor environments. For their protection, students must be immunised for:

- Tetanus
- Q-fever (unless the student has proven immunity – tested prior to vaccination)

Residential schools

The attendance requirement of residential schools within this degree is indicated by the following letters: R = Recommended; HR = Highly Recommended; M = Mandatory. To find out more about [residential schools](#), visit the [Residential School Schedule](#) to view specific dates for your degree, or visit the [Policy and Procedure Library](#).

If you are enrolled in the External study mode in this degree, you will have the opportunity to come on-campus for residential schools, where you will attend workshops and tutorials, use the facilities and meet staff and other students.

The courses below include residential school:

Core Courses

- AGR2109 Practical Investigations in Agricultural Technology

Production Technology Extended 12-unit Major

- [AGR1104 Farm Safety and Operations 1](#)
- [AGR2104 Farm Safety and Operations 2](#)
- [AGR2202 Instrumentation and Automation in Agriculture](#)

Animal Production 4-unit minor

- [AGR1101 Animal Health, Welfare and Behaviour](#)
- [AGR2203 Animal Nutrition](#)
- [AGR3202 Animal Reproduction](#)
- [BIO2103 Biology 2](#)

Crop Production 4-unit minor

- [AGR2304 Plant Breeding](#)
- [BIO1101 Biology 1](#)
- [BIO2202 Plant Physiology](#)
- [BIO3318 Plant Microbe Interactions](#)

Food Technology 4-unit minor

- [BIO3811 Food Product Development](#)
- [BIO3821 Food Quality Assurance](#)

Credit

Exemptions/credit will be assessed based on the [USQ Credit and Exemption Procedure](#).

full-time recommended enrolment pattern - Semester 1 start

Students are able to enrol in any offered mode of a course (on-campus, external or online), regardless of the program mode of study they enrolled in.

To satisfy the requirements of the program students must complete all of the Academic and Practice courses in the following table that shows the recommended enrolment patterns for on-campus and external students

for our Toowoomba campus. Students following a non-standard enrolment pattern should click on the course link in the table below to ascertain if a course is offered in another term.

Course	Year of program and semester in which course is normally studied						Residential school	Enrolment requirements
	On-campus (ONC)		External (EXT)		Online (ONL)			
	Year	Sem	Year	Sem	Year	Sem		
Year 1								
CSC1401 Foundation Programming	1	1,2,3			1	1,2,3		
GIS1402 Geographic Information Systems	1	1			1	1,3
