Bachelor of Engineering and Bachelor of Business (BEBB) - BEng BBus

QTAC code (Australian and New Zealand applicants): Toowoomba campus: 907342

CRICOS code (International applicants): 030308J

This program is offered only to continuing students. No new admissions will be accepted. Students who are interested in this study area should consider the Bachelor of Engineering (Honours) Bachelor of Business which will be offered from S1 2014.

Professional accreditation
A graduate of this program is eligible to apply for membership of Engineers Australia as a graduate Engineer. After further professional development, a graduate member with a Bachelor of Engineering may apply for chartered status as a Professional Engineer and, when granted, may use the post-nominal MIEAust CPEng.

The Bachelor of Engineering program is accredited by Engineers Australia and, through an agreement reached between the professional engineering bodies of other countries (the Washington Accord), is also recognised in the United Kingdom, the United States of America, Canada, Ireland, Hong Kong, New Zealand and South Africa.

Program aims
This combination of an Engineering program with a program in Business provides students with the opportunity to become qualified Engineers with a strong background in business principles and practice. There is an increasing need for engineering graduates to have business qualifications early in their career as they are often required to manage complex projects with both tight schedules and budgets. In some sectors of the industry a business qualification can be one of the criteria for promotion. Many engineers have completed a Master of Business Administration to satisfy this requirement. This program enables students to obtain qualifications in both disciplines at the same time.
The program offers students a high level of flexibility as they are able to choose wide ranging combinations of an engineering major and a business major that best suits their career aspirations.

For more details of the two programs that comprise this award, applicants are asked to refer to the Bachelor of Business and Bachelor of Engineering sections in this Handbook.

Program objectives
Graduates of the Bachelor of Engineering and Bachelor of Business program will have met the separate objectives of the Bachelor of Engineering and the Bachelor of Business programs.

Program Information Set
View USQ’s admission criteria, student profiles and a summary of all offers made under Course Admission Information Set via the QTAC website.

Admission requirements
To be eligible for admission, applicants must satisfy the following requirements:

- have studied four semester units and achieved an exit assessment of 'Sound Achievement' or better in each of the following Queensland Senior Secondary School subjects: English and Mathematics B. It is recommended that applicants should also have satisfactorily completed the subject: Physics, or
- be able to demonstrate that they have achieved an equivalent standard in these subjects at another institution, and
- Australian applicants: have achieved a Queensland Overall Position (OP) band, or an equivalent Rank based on qualifications and previous work experience, at or above the specified cut-off level

Students may apply for admission to study part-time or by distance education once they have completed 16 units of the Bachelor of Engineering program or if they are eligible for advanced standing of 16 or more units. This ensures that they are able to complete the program in the maximum duration of eight years.

All students are required to satisfy the applicable English language requirements.

If students do not meet the English language requirements they may apply to study a University-approved English language program. On successful completion of the English language program, students may be admitted to an award program.

Program fees
Commonwealth supported place
A Commonwealth supported place is where the Australian Government makes a contribution towards the cost of a students’ higher education and students pay a student contribution amount, which varies depending on the courses undertaken. Students are able to calculate the fees for a particular course via the Course Fee Finder.

Commonwealth Supported students may be eligible to defer their fees through a Government loan called HECS-HELP.

Domestic full fee paying place
Domestic full fee paying places are funded entirely through the full fees paid by the student. Full fees vary depending on the courses that are taken. Students are able to calculate the fees for a particular course via the Course Fee Finder.

Domestic full fee paying students may be eligible to defer their fees through a Government loan called FEE-HELP provided they meet the residency and citizenship requirements.

Australian citizens, Permanent Humanitarian Visa holders, Permanent Resident visa holders and New Zealand citizens who will be resident outside Australia for the duration of their program pay full tuition fees and are not eligible for FEE-Help.
International full fee paying place
International students pay full fees. Full fees vary depending on the courses that are taken and whether they are studied on-campus, via distance education/online. Students are able to calculate the fees for a particular course via the Course Fee Finder.

Program structure
The program involves five years of full-time study and to be eligible for the combined award, full-time students must complete the requirements of the program within seven years of their initial enrolment in the program.

Students may apply for admission to study part-time or by distance education once they have completed 16 units of the Bachelor of Engineering program or if they are eligible for advanced standing of 16 or more units. This ensures that they are able to complete the program in the maximum duration of eight years.

Where students intend to complete the program using a combination of full-time and part-time study the maximum time for completion will be calculated on a pro-rata basis.

The combined Bachelor of Engineering and Bachelor of Business degree is a 40 unit program consisting of Academic courses and Practice courses.

Academic courses are normally one-unit courses that involve approximately 155 hours of student work per unit.

Practice courses are zero unit courses and each involves approximately 50 hours of student work. The only grades available for a Practice Course are Pass (P) and Fail (F). A Practice Course is designed to enable students to acquire specific competencies associated with their Engineering major study. These competencies range from specific practical and communication skills through to generic competencies relating to ethical and social responsibility, awareness of the environment, teamwork, etc. For an external student a Practice Course generally involves attendance on-campus for a one-week residential school.

The components of the program are shown in the following table:

<table>
<thead>
<tr>
<th>Program Component</th>
<th>Number of Academic Courses</th>
<th>Number of Practice Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Studies</td>
<td>15</td>
<td>4</td>
</tr>
<tr>
<td>Engineering Major Study</td>
<td>17</td>
<td>3-8 depending upon the major</td>
</tr>
<tr>
<td>Business Major Study</td>
<td>8</td>
<td>0</td>
</tr>
<tr>
<td>Total Courses</td>
<td>40</td>
<td>6 - 8</td>
</tr>
<tr>
<td>Total Units</td>
<td>40</td>
<td>0</td>
</tr>
</tbody>
</table>

Required time limits
Full-time students have a maximum of seven years to complete this program. Part-time or distance education students have a maximum of eight years to complete this program.

A pro-rata adjustment of the maximum time period will apply for those students who transfer from one mode of study to another. A pro-rata reduction in the maximum time period will apply to students who are admitted to a program with advanced standing.

Core courses
The courses that comprise the core studies program are shown in the following table:

<table>
<thead>
<tr>
<th>Course</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC1101 Accounting for Decision-Making</td>
<td>1</td>
</tr>
<tr>
<td>LAW1101</td>
<td>1</td>
</tr>
<tr>
<td>MGT1000 Organisational Behaviour</td>
<td>1</td>
</tr>
<tr>
<td>MKT1001 Introduction to Marketing</td>
<td>1</td>
</tr>
</tbody>
</table>
When compared to the Core Studies program in the Bachelor of Engineering program the following changes have been made:

- the following courses have been deleted from the program: ENG2002 Technology, Sustainability and Society, and ENG3003 Engineering Management
- five courses from the Bachelor of Business have been added to the program.

### Major studies

**Engineering majors**

An Engineering major study provides students with knowledge and skills in a particular engineering discipline. Students must select one of the following eight majors as their Engineering major.

### Engineering major studies:

- Agricultural Engineering
- Civil Engineering
- Computer Systems Engineering
- Electrical and Electronic Engineering
- Environmental Engineering
- Instrumentation and Control Engineering
- Mechanical Engineering
- Mechatronic Engineering
- Power Engineering
The courses in each of the Engineering majors are listed in the Bachelor of Engineering section of this Handbook. Students enrolled in the Bachelor of Engineering and Bachelor of Business program only study 16 of the 19 courses listed in an Engineering major.

The three courses that are not studied in each major are listed in the following table:

<table>
<thead>
<tr>
<th>Engineering Major</th>
<th>Courses to be Deleted from the Major</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agricultural Engineering</td>
<td>2 Electives and either AGR3303 Agricultural Materials and Post-Harvest Technologies OR AGR3305 Precision and Smart Technologies in Agriculture</td>
</tr>
<tr>
<td>Civil Engineering</td>
<td>3 Electives</td>
</tr>
<tr>
<td>Computer Systems Engineering</td>
<td>1 Elective and ENG4004 Engineering Project and Operations Management and ELE2504 Electronic Design and Analysis</td>
</tr>
<tr>
<td>Electrical and Electronic Engineering</td>
<td>2 Electives and ENG4004 Engineering Project and Operations Management</td>
</tr>
<tr>
<td>Environmental Engineering</td>
<td>3 Electives</td>
</tr>
<tr>
<td>Instrumentation and Control Engineering</td>
<td>1 Elective and the courses ENG4004 Engineering Project and Operations Management and ELE2504 Electronic Design and Analysis</td>
</tr>
<tr>
<td>Mechanical Engineering</td>
<td>1 Elective and ENG4004 Engineering Project and Operations Management and MEC3403 Dynamics II</td>
</tr>
<tr>
<td>Mechatronic Engineering</td>
<td>1 Elective and ENG4004 Engineering Project and Operations Management and ELE2504 Electronic Design and Analysis</td>
</tr>
<tr>
<td>Power Engineering</td>
<td>3 Electives</td>
</tr>
</tbody>
</table>

Students should select any remaining Electives from the appropriate list for their engineering major.

Business majors

Students must select a business major from one of the following eight-unit majors:

- Business major studies:
  - Human Resource—Management
  - Information Technology Management
  - International Business
  - Management and Leadership
  - Marketing
  - Supply Chain Management
  - Sustainable Business
  - Sustainable Economics and Policy
  - Tourism Management

Note: With the permission of the Faculty of Health, Engineering and Sciences, students may select an alternative major from the Bachelor of Business or the Bachelor of Commerce. The eight courses that comprise each of the business majors are listed in the relevant sections of this Handbook.

IT requirements

Access to an up-to-date computer is necessary. On-campus students can access appropriately equipped laboratories, but should consider acquisition of their own computer. External students should be able to access a computer with the following minimum standards as advised by the University. All students should have access to email and the Internet via a computer running the latest versions of Internet web browsers such as Internet Explorer or Firefox. The University has a wireless network for on-campus students' computers. In order to take advantage of this facility and further enhance their on-campus learning environment, students
should consider purchasing a notebook/laptop computer with wireless connectivity. A notebook/laptop may be required for some courses.

Exit points
Students who, for whatever reason, are unable to complete the Bachelor of Engineering and Bachelor of Business and who satisfy all of the requirements of either the Bachelor of Engineering, the Bachelor of Engineering Technology, the Associate Degree of Engineering or the Diploma of Engineering Studies may be permitted to exit with that award.

Course transfers
Students who are enrolled in either the Bachelor of Engineering program or the Bachelor of Business program may transfer to the program with advanced standing. If they have completed up to one year of one of those programs they would normally be able to complete the program in the minimum time, after four more years of full-time study. Other students may require longer than the minimum time.

Honours
The Bachelor of Engineering and Bachelor of Business may be awarded with Honours in the engineering component of the award. The class of honours to be awarded to a student is dependant upon:

- the Grade Point Average calculated from the grades achieved in the courses studied in, or transferred to the program;
- the grade achieved by the student in the courses ENG4111 Research Project Part 1 and ENG4112 Research Project Part 2 (unless the student is exempted from these courses).

The minimum levels of achievement normally required for each class of honours are shown in the following table. To be assured of achieving a particular class of honours students must have achieved the specified grade in the research project courses and the minimum GPA requirements for all of the courses studied, for the last 16 courses studied, or for the last eight courses studied.

<table>
<thead>
<tr>
<th>Class of Honours</th>
<th>GPA Calculated from the Grades Achieved in:</th>
<th>Minimum Grade Achieved in Research Project Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>All Courses Studied in the Program</td>
<td>The Last 16 Courses Studied #</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The Last Eight Courses Studied #</td>
</tr>
<tr>
<td>First Class Honours</td>
<td>6.0</td>
<td>6.2</td>
</tr>
<tr>
<td>Second Class Honours - Division A</td>
<td>5.5</td>
<td>5.7</td>
</tr>
<tr>
<td>Second Class Honours - Division B</td>
<td>5.0</td>
<td>5.1</td>
</tr>
<tr>
<td>Minimum number of courses required</td>
<td>20</td>
<td>16</td>
</tr>
</tbody>
</table>

Footnotes
* The results from courses ENG4111 and ENG4112 must be included (unless the student is exempted from these courses).
# The best results in a semester are to be used when not all of the results from a semester are required.

Other information
To be eligible to graduate from the Bachelor of Engineering and Bachelor of Business, students must obtain an aggregate of at least 60 Days of suitable practical experience during their program. This experience may be in an engineering office or laboratory where the student would be working principally with professional engineers and engineering associates. It may, however, be preferable for students to spend some time in field or factory activities to gain insight into industrial practice and to see what is involved in converting designs into finished products. Students are required to enrol in ENG4909 Work Experience - Professional in the latter part of their program and keep a record of appropriate experience as specified in the Course Specification.

The work experience is to be endorsed by an appropriate person in the organisation providing the experience.
and submitted to the examiner. The student must meet all costs associated with the acquisition of practical experience to satisfy this requirement. The record of work experience must be made available for perusal by the Faculty of Health, Engineering and Sciences upon request. The acceptability or otherwise of employment experience, and the period of that type of experience that may be credited towards the 60 days, will be determined by the Examiner of ENG4909 Work Experience - Professional.

**Recommended enrolment patterns**

Students are able to enrol in any offered mode of a course (on-campus, external or online), regardless of the program mode of study they enrolled in.

Due to the large number of combinations of engineering and business majors available separate recommended enrolment pattern tables are not printed in this Handbook.

Commencing on-campus students should enrol in the standard first year courses in the engineering major that they have selected. Towards the end of their first year they should consult the Faculty of Health, Engineering and Sciences for advice on the enrolment pattern to be followed in later years of the program.
