Master of Engineering . (MENC) - MEng

This program is only offered to continuing students. No new admissions will be accepted. Students who are interested in this study area should consider the Master of Advanced Engineering which will be offered from S1 2014.

Professional accreditation

The Master of Engineering . is not accredited by any professional bodies other than the University of Southern Queensland.

Program aims

The aim of the Master of Engineering program is to produce graduates that are equipped with essential management knowledge and an appreciation of the latest technologies in addition to their initial specialisation. The skill set would therefore allow the graduate to manage more complex technological or engineering businesses.

Program objectives

Students who successfully complete the Master of Engineering will be able to demonstrate their ability to:

- Critically evaluate knowledge from literature and other information sources relevant to their field
- Apply asset management theory and practice to the management of engineering assets
- Evaluate the importance of technological innovation and risk in engineering businesses
- Apply the specialist knowledge and skills acquired in their major

Admission requirements

To be eligible for admission, applicants must satisfy the following requirements:

Possess a four year Bachelor of Engineering degree awarded by an Australian university, or an equivalent qualification awarded by an overseas institution. Candidates who wish to study a technical major will be expected to have completed an appropriate major in their undergraduate program.
The standing of degrees awarded by an overseas institution will be determined by reference to the National Office of Overseas Skills Recognition (NOOSR).

All students are required to satisfy the applicable English language requirements.

If students do not meet the English language requirements they may apply to study a University-approved English language program. On successful completion of the English language program, students may be admitted to an award program.

Program fees

**Domestic full fee paying place**

Domestic full fee paying places are funded entirely through the full fees paid by the student. Full fees vary depending on the courses that are taken. Students are able to calculate the fees for a particular course via the Course Fee Finder.

Domestic full fee paying students may be eligible to defer their fees through a Government loan called FEE-HELP provided they meet the residency and citizenship requirements.

Australian citizens, Permanent Humanitarian Visa holders, Permanent Resident visa holders and New Zealand citizens who will be resident outside Australia for the duration of their program pay full tuition fees and are not eligible for FEE-Help.

**International full fee paying place**

International students pay full fees. Full fees vary depending on the courses that are taken and whether they are studied on-campus, via distance education/online. Students are able to calculate the fees for a particular course via the Course Fee Finder.

Program structure

The Master of Engineering comprises eight single unit Academic courses as follows:

- Two core courses:
  - ENG8103 Management of Technological Risk
  - ENG8104 Asset Management in an Engineering Environment
- A four course major; and
- Two Elective courses.

Major studies objectives

The major study provides students with knowledge and skills in a specific discipline. The thee major study areas in the Master of Engineering are:

- Advanced Structural Engineering Design
- Engineering Management
- Engineering Project Management

IT requirements

Access to an up-to-date computer is necessary. On-campus students can access appropriately equipped laboratories, but should consider acquisition of their own computer. External students should be able to access a computer with the following minimum standards as advised by the University. All students should have access to email and the Internet via a computer running the latest versions of Internet web browsers such as Internet Explorer or Firefox. The University has a wireless network for on-campus students’ computers. In order to take advantage of this facility and further enhance their on-campus learning environment, students should consider purchasing a notebook/laptop computer with wireless connectivity. A notebook/laptop may be required for some courses.
Articulation

Students who have completed the Postgraduate Certificate of Engineering are able to apply to articulate with full credit into the Master of Engineering program if they study the same major in this program and satisfy admission requirements to the Master of Engineering program.

The standing of degrees awarded by an overseas institution will be determined by reference to the National Office of Overseas Skills Recognition (NOOSR).

Credit

Exemptions/credit will be assessed based on the USQ Credit and Exemption Procedure.

Advanced Structural Engineering Design Major recommended enrolment pattern

Students are able to enrol in any offered mode of a course (on-campus, external or online), regardless of the program mode of study they enrolled in.

Schedule A: Core Courses

Students must complete the two courses in this schedule:

- ENG8103 Management of Technological Risk  
- ENG8104 Asset Management in an Engineering Environment

Schedule B: Major Courses

Students must complete the four courses in this schedule:

- CIV8801 Code-Based Structural Design
- CIV8803 Mechanics and Technology of Fibre Composites
- CIV8804 Advanced Design Practice using Finite Element Analysis
- CIV8802 Advanced Prestressed Concrete

Schedule C Elective Courses

Students must complete two courses from this schedule:

- ENG8011
- ENG8206 Whole of Life Facilities Management
- ENG8205 Technology Management Practice

Notes:

With the prior approval of the Faculty of Health, Engineering and Sciences, students may complete a postgraduate structural engineering course at another university as one of their Elective courses.

Engineering Management Major recommended enrolment pattern

Students are able to enrol in any offered mode of a course (on-campus, external or online), regardless of the program mode of study they enrolled in.

**Schedule B: Major Courses**

Students must complete the four courses in this schedule:

- ENG8101 Technological Impact and its Management
- ENG8102 Towards Sustainable Development#
- ENG8205 Technology Management Practice
- ENG8207 Technological Innovation and Development

**Schedule C Elective Courses**

Students must complete two courses from this schedule:

- ACC5502 Accounting and Financial Management
- ENG8011
- 3ENG8111 Project Requirements Management
- 3ENG8205 Technology Management Practice
- 2ENG8204 Management of Environmental Technology
- 2ENG8206 Whole of Life Facilities Management
- FIN5003 Decision Support Tools
- MGT5000 Managing Organisational Behaviour

**Footnotes**

# This course is not available in 2013. Students should instead substitute ECO8012

** Not available in 2013

**Notes:**

Some courses may be offered on-campus at Springfield.

**Engineering Project Management Major recommended enrolment pattern**

Students are able to enrol in any offered mode of a course (on-campus, external or online), regardless of the program mode of study they enrolled in.
